

**DIFFERENCE BETWEEN 1969 MUSTANG COUPE/CONVERTIBLE END CAPS AND 1970 MUSTANG COUPE/CONVERTIBLE END CAPS**

Pictures above are of a stock 69 End Cap when placed up against the stock Later 1970 Quarter Panels. The peak at the top of the 69 End caps make more of a point compared to the 1970 Quarter Panel that has a flat spot at the top of the quarter panel curve.

Picture **above to the left** shows a stock 1970 end cap. Picture **above to the right** shows the Stock 1969 end cap (In Red) next to the later stock 1970 end cap (In Grey). You can see the difference between the two at the top where the arrows point.
