

Detroit Speed
DSE Stainless Steel Headers
Aluma-Frame w/Coyote Engine
P/N: 061005DS

The Detroit Speed headers are designed and engineered for Ford Coyote/Boss 302 based engines installed in the Detroit Speed Aluma-Frame front suspension system when installed in a 1964.5-1970 Mustang. These headers are designed for performance, maximum ground clearance, and a clean engine compartment appearance. The DSE Stainless Steel headers are durable, attractive, and come with the necessary clamps to make installation easy. The DSE Stainless Steel Headers use a 1-7/8" primary tube diameter with four-way merge collectors featuring V-Band clamps. Each header features an O₂ sensor bung in the collector.

NOTE: When installing these headers in the DSE Aluma-Frame, it is required that you use the Detroit Speed Ford Modular Engine Mount Kit P/N: 060420DS.

Recommended Parts for Installation		
Description	Coyote	Boss 302
Header Gasket	OEM 2011+ Ford Mustang GT	OEM 2012-13 Boss 302
Header Studs	M10-1.5x25	M10-1.25x25

If an O₂ sensor is not being used, the bung can be plugged using a M18-1.75 plug.
