

3643MF Sequential Lamp Harness

LEGEND

- A** = Blue wires to License Lamp Assembly
- B** = Black wires to ground at Trunk Latch Support
- C** = Red & Black wires to Reverse Lamp Assemblies
- D** = Green wire to Right Turn Signal Feed
- E** Blue wire to Park Lamp Feed
- F** = White wire to Left Turn Signal Feed
- G** = Brown wire to Reverse Lamp Feed

Troubleshooting Note:

Sequential operation requires full voltage to rear lamps. Engine should be running, alternator putting out full voltage, turn signal and flasher in good working order. A heavy-duty flasher is recommended due to additional lamps.
